

OEM Communication Module

Model RS485-USB-IND

The Model RS485-USB-IND Communication Module is built for use with rugged Orientation Modules, typically in academic and industrial applications. For ease of use, Windows GUI is provided showing orientation and raw sensor data. The RS485-USB-IND may be used with the Cable-IND-10, a 10-foot, water-resistant cable. Custom cable lengths are available, and multiple sensors may be added in series to suit any requirements and applications.

Applications

- Robotic
- Industrial
- Research

Features

- Rugged water-resistant housing
- Communicates to multiple sensors
- Passes power from USB through to connected sensors

Specifications

Connectors:	4 pin circular, water resistant USB A-type
Dimensions:	89mm x 20mm x 15mm / 3.5" x 0.8" x 0.6"
Weight:	37g / 1.3oz
