

OEM Communication Module

Model RS485-USB-M

The Model RS485-USB-M Communication Module, for use with rugged Orientation Modules, is built to meet the rigorous challenges of the marine environment. For ease of use, Windows GUI is provided showing orientation and raw sensor data. The RS485-USB-M is built for use with the Cable-M-40, a 40-foot waterproof cable. Custom cable lengths are available or can be made with off-the-shelf, 4-pin circular, wet mateable connectors, and multiple sensors may be added in series, configurable to suit your specific requirements and applications.

Applications

- Marine
- Industrial

Features

- Water resistant, rugged case
- Long distance communication (up to 300 meters)

Specifications

Connectors:	4 pin circular, wet mateable 12V DC circular power jack USB B-type
Dimensions:	216mm x 165mm x 83mm / 8.5" x 6.5" x 3.25"
Weight:	0.81kg / 1.78lb
