

Release 3.7.7 Notes

July 26, 2019

Feature Updates

Asset Images

Document your assets with images and tags. The Asset Details screen now supports images of the asset and monitoring points and allows as many as needed. This is a great way to stay familiar with assets, post motor plate images, etc. Currently supports .jpg and .png image file types.

Other Enhancements

- Collector Dependent Systems upgrades and fixes. System updates every minute (previous: every hour)
- Important Fixes:
 - *Collector Dependent Systems*: duplicate systems showing up
 - *Collector Dependent Systems*: incorrect groups populating systems
 - *Collector Dependent Systems*: 'ghost AWOLs' showing up
 - *Collector Dependent Systems*: AWOL report not working correctly
 - Monitoring point multiplier not accepting decimal values
 - Uploading a template from one location to another is failing
 - Pump efficiency unable to export data from trend graph
