

Smart Diagnostics® 3.5

Welcome to 3.5

10/20/2017

This version adds an enhanced Mobile UI, adds read-only versions of admin pages for user level accounts, and opens dashboard creation to admin accounts with a new Bar Chart widget.

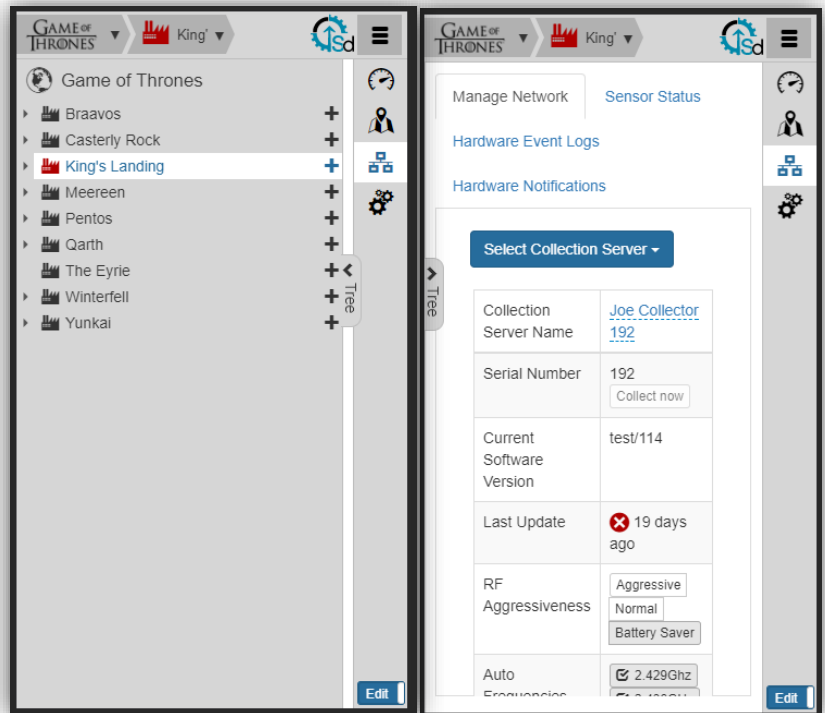

New Features

Mobile Interface

We added some interface improvements designed exclusively for mobile browsers. View trends, manage hardware, check alarms, and more from the convenience of your mobile device.

Features:

- Collapsible Navigation Tree
- Condensed View Tabs
- Responsive Design
- Portrait/Landscape Support
- Scrollable Banner and Navigation Pane
- Supported by Most Mobile Browsers

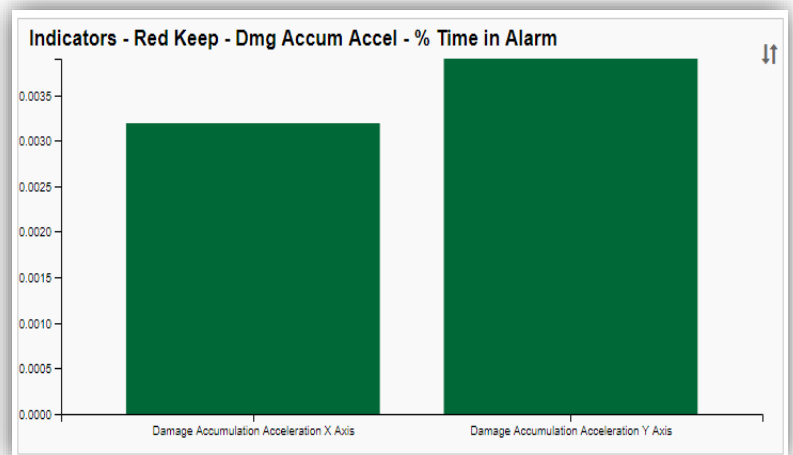

Dashboards

Dashboards can now be created and edited by administrators. Create your own customizable dashboards for each of your locations or create a corporate level dashboard to compare performance across multiple locations.

Bar Chart Widget

- Create a customizable bar chart at both the location and corporate levels
- Add color thresholds to highlight faults
- Sort bars in alphabetical, ascending, or descending order

Edit|View Toggle

The addition of an Edit|View toggle allows standard users to be able to view pages that were once hidden and helps prevent accidental changes.

New 'User' Features

- View Indicator Settings
- View Current Notification Subscriptions
- View Network/Hardware Information
- View and Download System Templates
- Acknowledge Alerts Notifications
- And More...
