

# Smart Diagnostics<sup>®</sup> 3.6.1

Welcome to version 3.6.1

04/09/2018

**Version 3.6.1** Makes improvements to the system reliability and adds the user capability to add up to two additional profile levels to the system tree.

## Enhancements in version 3.6.1

### Two additional levels in the profile tree

With additional profile levels available to add to your system tree, system administrators have even more flexibility to build and manage their system, especially for larger system structures.

### Improved system reliability

We've implemented some important backend scaling features that will increase SmartDiagnostics reliability moving forward.
