

# Smart Diagnostics® 3.7.3

January 21, 2019

## SmartDiagnostics Feature Updates

### • Filters

- **Default filter Buttons** for Damage Accumulation, Overall Vibration, Peak Acceleration, Peak Velocity, RMS Velocity, Temperature, Vibration Bands, Battery Voltage.
- **Multi-select:** All filters can now be combined with multi-select using [Ctrl] and/or [Shift] keys
- **Axis Filters:** we've added X & Y axis filter buttons. Use these with multi-select to quickly narrow your analysis to see the metrics you want

- **Login Screen update:** you will see a slight change in the login screen, everything works the same as before
- **Threshold Color Change:** we made the alarm threshold levels easier to view on the trend plot

For any issues related to SmartDiagnostics software, please contact KCF Support via email: [support@kcftech.com](mailto:support@kcftech.com)  
Or click on '**Get Help**' in the user options menu in SmartDiagnostics.
